WORK EXPERIENCE

HF Sinclair

Dallas, TX

Diversified Energy company with refining, midstream, marketing, lubricants/specialty products, and renewable diesel segments. Annual revenue of \$29 Billion.

Business Analyst – Refining Operations (Special Assignment)

July 2025 – Current

- Drive continuous operational improvement by analyzing refining data to identify trends and insights for leadership; including statistical analyses to uncover correlations that inform safety and compliance decisions
- Serve as product owner for refining operations analytics tools, coordinating IT and business teams to deliver new features in days instead of weeks, while ensuring solutions align with leadership needs and priorities.
- Coordinate refinery business plans and communications on behalf of 17 leadership members to support strategic planning and alignment between operations, commercial, and support functions; saving leaders 20% of time

Senior Data Analyst – Procurement Analytics

January 2025 – July 2025

- Owned strategic analyses on refining and category management challenges, leveraging Snowflake, SAP, and Power BI to deliver insights that enable cost reductions, process improvement, and executive decision-making.
- Expanded analytics ecosystem for OpEx, maintenance, turnaround, and contractor management; provided training and adoption support to drive self-service analytics across procurement and refining; drove 43% increase in report usage.
- Served as a data subject matter expert (SME) bridging IT and business teams, advising other analytics teams and stakeholders on best practices for designing and scaling analytics tools.
- Held key role in building and standardizing a new data analytics team, managed summer intern, mentored junior analysts, while setting technical standards to improve capability and productivity.

Category Analyst – Procurement (Maintenance, Turnaround, & Catalyst)

September 2023 – January 2025

- Engineered scalable data model and reporting for contractor management strategy, enabling 200+ users to identify savings opportunities and apply lean principles across refining operations; Realized \$30MM in savings to date.
- Recognized with President's Award by CEO for extraordinary project results and business impact.
- Automated procurement reporting by streamlining Excel-based processes and building flexible Power BI data models that integrated manual inputs, reducing effort, improving consistency, and accelerating insights for stakeholders.
- Achieved value capture of \$2MM+ for 2024 performance year through RFP negotiation, cost avoidance, and volume rebates.

Rotational Development Associate (6 months per department)

July 2022 – September 2023

- **Renewables (Commercial):** Built Power BI reporting for sales margins & expenses, developed feedstock specification & negotiation tool, and automated rail logistics tasks saving 4 to 7 hours per week.
- **Internal Audit (Business Process):** Developed analytics for expense audits, validated sustainability report metrics, evaluated business & operational processes, and provided SOX compliance process improvements.
- **Procurement (Misc. Services):** Managed major RFP & change management initiative for Branded Marketing saving ~1MM annually, performed analysis on proposals, and developed scorecard evaluation model & standard vendor forms
